**SUPPLEMENT TO
REPORT NO.**

25X1X 1. The production program of the Oberspreewerk for the year 1950 contains orders for the production of the following items:

- a. Ultra short-wave transmitter for the Eastern Zone postal service.
- b. Short-wave transmitter, stationary and mobile, for the people's police (Volkspolizei).
- c. Short-wave receiver for the people's police, stationary and mobile.
- d. Television receiver.
- e. Oscillographs.
- f. Quality coefficient meter
- g. Electronmicroscope
- h. TV film scanning device
- i. Large projection tubes.

All of these instruments are to be developed and a pilot model of each is to be constructed.

2. It was originally intended to place the orders for the Volkspolizei equipment with Telefunken in Berlin because Western firms could be expected to develop better short-wave instruments than East Zone firms. But this project had to be dropped because of a shortage of West Marks, and OSW was ordered to work on these orders.

3. The 1950 development plan in the field of decimeter wave instruments has not yet been approved by the Soviets. Approval is expected by the end of January.

This document is hereby regraded to **CONFIDENTIAL** in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the United States.
